

# Step-by-Step Process for Secure Installation

## Tools & Materials Required

- Soft-close adapter kit
- 5/64 inch drill bit
- Power drill
- Screwdriver
- Measuring tape
- Pencil for marking

## Stepwise Process for Installation

### 1. Test Cabinet Compatibility

- Open the cabinet door fully
- Place your fingers as a block
- Remove your fingers to check if the door closes on its own
- If it closes automatically, your cabinet is compatible

### 2. Locate Installation Spot

- Open the cabinet door completely
- Find the hinge side of the door
- Look for the upper corner area
- The adapter will fit in the top section

### 3. Position the Adapter

- Place the adapter against the cabinet frame
- Make sure the lip hooks onto the cabinet edge
- Check that it sits flush with the surface

### 4. Prepare for Mounting

- Mark the screw hole location
- Choose the correct side hole (works for left or right)
- Pre-drill using 5/64 inch drill bit

### 5. Complete Installation

- Insert provided screw
- Tighten until secure
- Avoid over-tightening
